Member of
The American Association of Nurserymen

Forman's
Glebe Wood Gardens
Ballston, Virginia

On The Glebe Road Between
Wilson Boulevard and Columbia Pike

WE take pleasure in offering to our customers, and others interested in plants and landscape gardening, the following list of ornamental nursery stock for the fall of 1928 and the spring of 1929. In selecting varieties for our trade we have been governed by our experience of over fifteen years in Washington and vicinity, and the experience of others over a longer period, and it is with the utmost confidence that we recommend the species listed herein as hardy and adaptable to local conditions of soil, weather, and other prevailing cultural hazards. We have had so few losses in our plantings, or in plants that the home owner has personally planted, that we believe that our stock is nearly 100 per cent safe in handling, and with these records in mind we have no hesitancy in standing squarely behind our products and service.

In buying plant material the buyer should consider the advisability of securing the stock nearby, where there are no delays in transit, uncertain shipping dates, and lost shipments, and where personal selections can be made by the purchaser. Our delivery service is adaptable to your requirements and we are always glad to make deliveries at the time desired whenever possible.

In addition to the material listed herein we will be glad to quote on certain large specimens and on quantity lots in the smaller sizes.

Our prices are based on well-grown quality stock, which has been frequently trimmed and

root pruned. We guarantee our material to be delivered in first-class condition and to be of size designated and true to name. We make no other agreements concerning replacements, or the growth of stock, unless by special agreement and in writing on order, invoice or estimate, and then only for a period of six months, and providing the account has been paid in full within thirty days from the date of its rendering.

We maintain a planting service at nominal rates, and will gladly call at your home and make suggestions for the arrangement of your grounds and plantings. As references we can direct your attention to existing examples of our work, including such types as foundation plantings, rear yard gardens, rock gardens, large tree moving, etc.

Our associate business, the Garden Supply Company, located here, will be glad to show you a most complete assortment of Hardy Perennials, Roses, Vines and Bulbus Plants. These plants are listed in a separate booklet, which we will be glad to mail to you.

We have men especially trained and equipped for taking care of shade and fruit trees, doing such work as Pruning, Tree Surgery, Root Feeding and Spraying. Mr. Walter C. Biller, who is in charge of this work, is always at your service if you wish advice or estimates.

To reach our grounds, cross the Key Bridge in Georgetown and take the Wilson Boulevard from the Virginia end of the bridge to Ballston. Turn to the left where the Glebe Road crosses the boulevard and go in that direction approximately one-half mile. You will find our place to be the nearest of all nurseries to central Washington.

OFFICE AND GROUNDS:
Glebe Road, Near Pershing Drive
Ballston, Virginia

FORMAN'S GLEBEWOOD GARDENS

Evergreens

Coniferous

Our evergreens are frequently transplanted or root pruned and sheared at least once a year. This provides a root system easily handled and a thick furnishing of foliage that is highly desirable. Plants that have not been cared for in this way can not be compared in value with plants that have had this attention. We gladly invite comparison of our stock and others, both as to quality and price. In addition to the regular list, we have larger specimens of the finest quality upon which we will be glad to quote.

ABIES—Pseudo-tsuga Douglassi—Douglas fir
3 to 3½ feet..... \$6.75

ARBORVITAE (see Biota and Thuja).
